                         By messenger ..... ☐

In response to EPA's request for updated information related to specific Libby area properties, please find a CD containing electronic documentation of work conducted by EPA or its contractors. Information collected since the last request for information in September 2006 is discernable by the date within each of these files.

The documentation is organized by property owner last name and address, and is inventoried on the attached table (Table 1). The updates are summarized as follows:

- The property at 188 Highwood Dr has undergone additional investigation.
- The property at 3696 W. 2nd St Ext has undergone additional investigation.
- The property at 94 Rainbow Ln has undergone additional investigation.
- The property at 1021 Main Ave has undergone additional investigation.
- The property at 208 W. Spruce St has undergone additional investigation.
- The property at 392 Garrison Rd was previously indicated as not been visited; however, some investigation has been performed at this property. This 2/5/07 update provides all currently available information for 392 Garrison Rd.
- The property at 420 Indian Head Rd has additional investigation following remediation activities.
- The property at 203 E. Spruce St has undergone remediation activities. Note that information for 206 E. Spruce St (another property owned by Mr. George Bauer) was inadvertently provided in the 9/14/06 request. This 2/5/07 update provides all available information for 203 E. Spruce St.
- The property at 902 E. Lincoln Blvd has undergone remediation activities.
- The property at 416 W. 4<sup>th</sup> St has undergone remediation activities.
- The property at 609 E. 9<sup>th</sup> St has undergone remediation activities.

As discussed, for the property at 5000 Highway 37 N, all property information has been compiled electronically with the exception of approximately 60 oversized drawings. A full set of this documentation was provided to Paul Peronard in January 2007. If requested, CDM will reproduce this documentation. For this subpoena request for updated property information, sample results, the Action Memorandum specific to the property, and the table of contents for the January 2007 EPA deliverable is provided on the CD.

For each electronic property folder on the CD, documentation is organized as follows:

1. Investigation – includes, as applicable, access agreements for investigation work, investigation field forms, log notes, and field sample data sheets.
2. Sample Results – includes, as applicable, asbestos analytical results available as of February 3, 2007 in the Libby2 project database. Libby Amphibole (LA) asbestos bins, as seen in the soil results worksheet header, correspond to the following LA asbestos levels as measured by various polarized light microscopy (PLM) methods:
  - Bin A – non-detect
  - Bin B1 – trace (less than 0.2%)
  - Bin B2 – between 0.2 and 1%
  - Bin B – less than 1% (this bin associated with PLM-9002 and PLM-Grav only)
  - Bin C – 1% or greater
3. Community Involvement – includes, as applicable, Superfund temporary relocation assistance forms and records of communication with property owners.
4. Remediation – includes, as applicable, access agreements for remediation work, property-specific work plans, field log notes and sample data sheets for confirmation sampling, property closeout checklists, HEPA vacuum receipt forms, completion forms, and correspondence with property owners.
5. Post remediation – includes, as applicable, interview forms, field log notes, and field sample data sheets.

Should you have any questions or additional information needs, feel free to contact Jeff Montera in Denver at 720-264-1116, or me at 406-293-8595 x36.

Thank you.

  
Terry Crowell
